Guardian Weathershield IP55

Guardian Weathershield IP55: Wiring Devices | Ingress Protected

This attractive & unique MK Guardian Weathershield is designed for use in either outdoors or indoors, and now also available in 2 Gang size. Engineered to supply electricity in potentially dangerous areas heavily exposed to dust and splashing such as the balcony, garden, workshop, industrial compound, farm, swimming pool or even the seaside.

IP55 Protection

MK Guardian Weathershield is rated IP55, with each number in an IP (Ingress Protection) rating indicating the resistance to invasion by dust and water.

First digit defines Dust Protection – Dustproof protection from dust, sawdust and other small particles.

Second digit defines Water Protection – Waterproof protection from strong Jets of water from any direction.

Innovative Features and Benefits

1

2

3

4

- IP55 rated for dust and water protection.
- 1 Gang Guardian Weathershield can be installed either with Switches or Socket Outlets of 86mm x 86mm size.
- The new 2 Gang version can be installed with 2 Gang socket outlets or other accessories of 146mm x 86mm size.
- Tested and comply with BS EN 60529/IEC 60529.

- Transparent cover allows visibility to the installed product's switching position (i.e. ON/OFF).
- Able to shield and provide safe connection for any appliance without any need for costly special designed plugs.
- When 1 Gang Guardian Weathershield is mounted with its designated surface box (GWS/1/B), IP55 protection for surface mounting is achieved.

- Built-in padlock hole provides secured padlocking and prevent tampering with the power supply.
- The proper sitting of the plug cable prevents water penetration thus achieving IP55.

- A stopper is used to prevent water penetration if the Guardian Weathershield is installed with a switch thus achieving IP55.
- Made with highly durable and UV stabilized material to ensure safety and reliability.
