MK DIMENSIONS

Decorative Wiring Devices

Simple, modern design with practical engineering innovation

FEATURED PRODUCT: 1G SINGLE 2 WAY DIMMER – SATIN BRASS WITH BLACK TRIM

WEALTH OF EXPERTISE STARTS HERE

For almost 100 years, MK Electric has led the market in electrical wiring devices.

Engineering excellence and manufacturing expertise ensures quality, reliability and safety come as standard.

BROAD RANGE

MK DIMENSIONS features the latest product innovations, including integrated USB sockets, LED dimmers and multimedia plates – all designed to meet the exacting needs of any application.

* Exceptions apply, please refer to MK Electric Catalogue no.49 product guarantees

FEATURED PRODUCT: 1G SP 2 WAY 20A SWITCH - SATIN STEEL WITH BLACK TRIM

ENDURING DESIGN STARTS HERE

Simple, modern design with practical engineering innovation. The new MK DIMENSIONS range is perfect for every setting.

NO VISIBLE SCREWS

Thanks to its stylish screwless design and flexible range of eight modern finishes, the MK DIMENSIONS range blends in seamlessly with every contemporary space.

MK's Design Service offers a bespoke option, perfect for when only a customised solution can meet your requirements.

THE NEW WORD IN FLEXIBILITY STARTS HERE

The new MK DIMENSIONS range combines style and value, without compromising on quality. Designed and engineered to make life simple.

CHOICE

Available in eight high quality finishes including metals and synthetics.

Enabling design scalability within a building, from a typical hotel room to a larger suite, or 'back of house' offices to high footfall reception areas.

Additionally, frontplates can be interchanged to accommodate evolving interior design over time.

FEATURED PRODUCT: 2G 13A DP DUAL EARTH INTEGRATED USB SWITCHSOCKET – BRONZE WITH BLACK TRIM

HASSLE-FREE INSTALL STARTS HERE

Easy to install. Easy to use. Hard to ignore. The new MK DIMENSIONS range guarantees you reliable, hassle-free products that don't sacrifice form for function.

TWO-PIECE PRODUCT SOLUTION

Specifically designed to be modular, the clip-on frontplate and functional module are individual component products – so you can order the parts separately to fit in with your build schedule.

Perfect for achieving a flawless finish after interior decoration and eliminating damage during the fit out process.

INNOVATION AND PRACTICALITY STARTS HERE

Engineered to deliver innovative, hassle-free installation, each MK DIMENSIONS functional module comes complete with a robust and recyclable protective cover plate.

PRACTICAL

By utilising the protective cover plate you can safeguard the final clip-on frontplate against loss.

It also reduces the potential cost of replacing the frontplate due to damage caused by paint splatter or build up, sanding abrasions and defends against knocks and scrapes from ladders or tools whilst on site.

Although it's covered, the functional module beneath still meets British Standards and therefore is fully operational so you can continue to get the job done.

When you're ready, clip on the frontplate for a flawless finish to any contemporary interior.

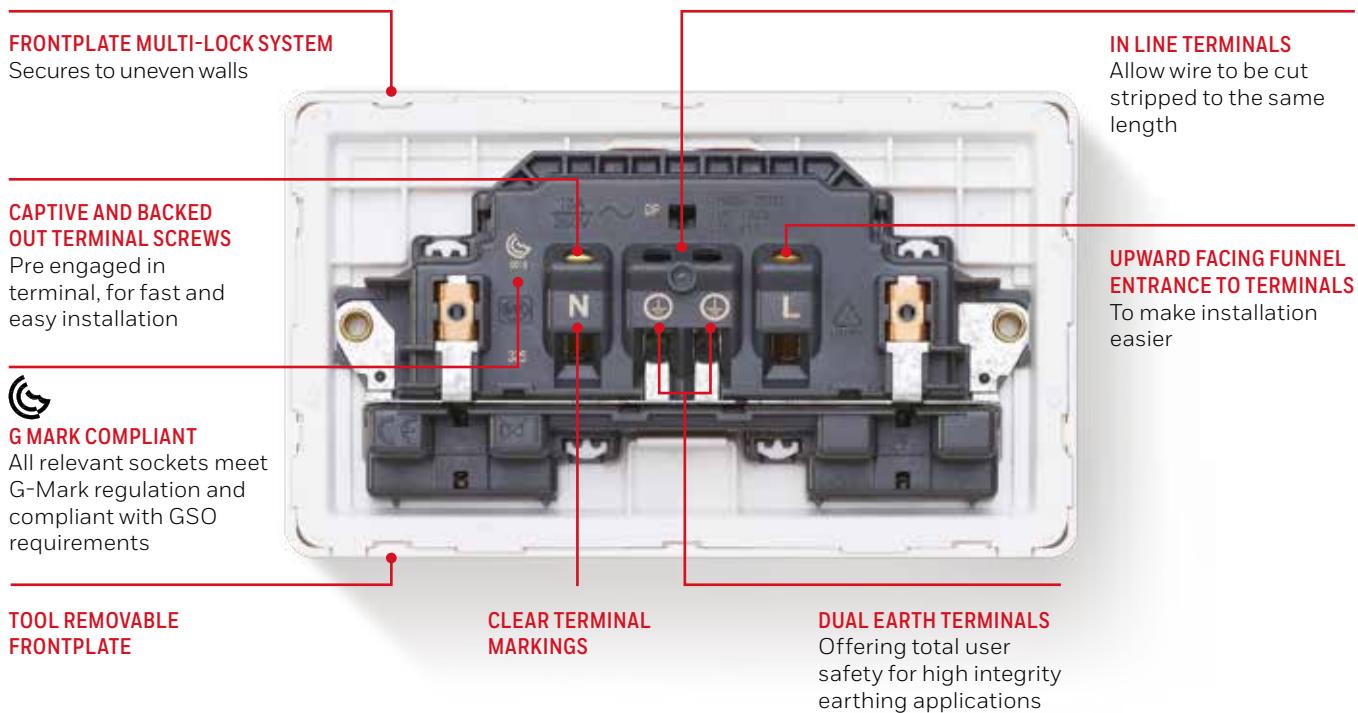

FEATURED PRODUCT: 2G 13A DP DUAL EARTH SWITCH SOCKET - WHITE

PRACTICALLY ENGINEERED, INNOVATIVELY DESIGNED

MK DIMENSIONS comes complete with a whole host of features to aid installation.

INSPIRATION STARTS HERE

We've made MK DIMENSIONS truly flexible, so you can pick the right style to suit any contemporary space.

Choose from our range of eight metal and synthetic frontplate finishes and select a black or white functional module to complement. Metal finishes additionally come with the option of a black or white trim to harmonise with your functional module selection.

FLEXIBLE ORDERING OPTIONS

STARTS HERE

TWO-PIECE PRODUCT SOLUTION

We've made ordering just as easy as installation, thanks to our simple step-by-step product selection guide and flexible, modular two-piece product solution.

The functional module and clip on frontplate are individual components
- select both to achieve your complete MK DIMENSIONS screwless wiring device.

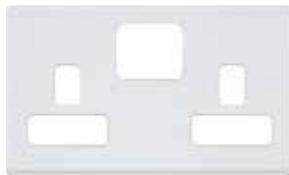

STEP 1: CHOOSE A FUNCTIONAL MODULE IN WHITE OR BLACK

All functional modules are supplied with a protective clear cover plate, perfect for achieving a flawless finish after interior decoration and eliminating damage during the fit out process. See our Product Selector on the following pages for part number details.

FUNCTIONAL MODULE

+

CLEAR COVER

=

MH4347BLKC

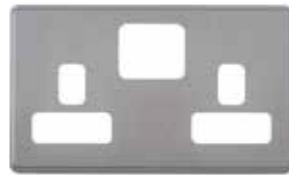

STEP 2: CHOOSE A CLIP ON FRONTPLATE FROM THE CHOICE OF EIGHT HIGH QUALITY FINISHES

Select the corresponding frontplate to accompany your functional module.
See our Product Selector on the following pages for part number details.

This design incorporates a double wound isolating transformer rated 20VA at 230 or 115 volts and meets BS EN 61558-2-5:1998 making it safe for use in bathrooms. Insertion of a shaver/toothbrush plug automatically switches on by energising the primary side of the isolating transformer - removal automatically switches it off. The transformer is protected against overload by an automatic solid state overload device with automatic resetting.

These dimmers employ the latest micro-controller based circuitry to provide electronic soft-start and overload protection. They are suitable for use with good quality electronic or wire-wound transformers. Can also be used with good quality halogen lamps incorporating GU10 bases. Please check with lamp manufacturer to determine suitability.

NOTE

Grid frontplates include an integral grid mounting frame. See page 24 for full range of Grid Functional modules.

NOT SUITABLE FOR FLUORESCENT LOADS

Conform to latest standards BS EN 60669-2-1. All intelligent dimmers have a combined push-on/push-off switch and rotary dimmer control, and are suitable for one or two-way switching. Only one dimmer can be used in a two way switching circuit.

*Available with the option of either a white or black plastic trim. Add suffix 'W' or 'B' to the part number when ordering, e.g.

MHFPxxxBSSW - Brushed Stainless Steel finish with a white trim.

NB: It is recommended to match the trim colour to the functional module selected

WIRING DEVICES TECHNICAL

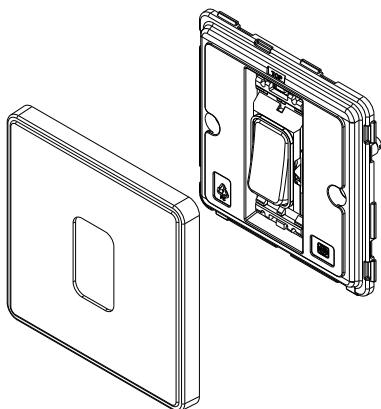

MK DIMENSIONS

INSTALLATION

The MK DIMENSIONS products consist of the main product module, complete with support frame, plus a separate clip on clear protective frontplate. The product is mounted to the wall, after wiring, and the clear protective frontplate is clipped onto the frame..

1. Ensure the depth of the back box is correct for the product and that it is fitted securely to the wall.
2. Install the cables in the normal way and, using the fixing screws supplied, mount the product, minus its frontplate, to the wall. It is important the correct headed screws provided are used as any other may clash with the rear of the frontplate.
3. Do not over tighten the screws, so as to prevent damage or distortion to the product or support frame. Adjust so the frame or module sits squarely on the wall.
4. Care should be taken to ensure product features such as snap fits are not blocked during installation or decorating, preventing correct fitting of frontplates (for example plaster, tile grout, paint etc).
5. Apply clip on frontplate.

FITTING AND REMOVING THE FRONTPLATE

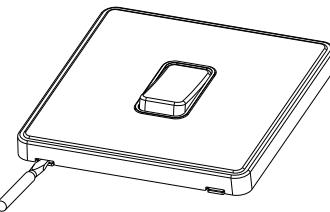

FITTING THE FRONTPLATE

1. Align the frontplate with the front of the wall module and press gently in all four corners until the frontplate clicks into place.
2. Gently push along all outer edges to ensure the frontplate is securely fitted to the wall module.

GASKET

1. A gasket is also supplied which may prove useful for installation on uneven wall surfaces.
2. Using the gasket with all switches will ensure compliance to IEC 60669.
3. IEC 60669 is intended to guarantee full engagement of the frontplate on uneven surfaces, even when there is a mismatch of as much as 1mm between the distance the main body of the product is from the wall and that of the front plate.
4. Where no gasket is used, if thick wallpapers are cut such that they fit around the module but remain under the edge of the frontplate, full plate engagement with the frontplate clips may be restricted.

REMOVING THE FRONTPLATE

1. Carefully insert a 4mm screwdriver into the slots provided along the bottom edge frontplate.
2. Carefully twist the screwdriver and lift the frontplate away disengaging the snap fits.

Note: Ensure the correct frontplate is fitted to the correct module or frame.

Care should be taken to ensure product features such as snap fits are not blocked during installation or decorating, preventing correct fitting of frontplates (for example plaster, tile grout, paint etc).

WIRING DEVICES TECHNICAL

INSTALLATION GENERAL INFORMATION

Socket outlets, switches and other MK wiring accessories can be wall or bench mounted. Do not use a trailing lead for sockets and connection units or mount any devices where they may be subject to excessive moisture or dampness.

CABLE MANAGEMENT

Socket outlets, switches and other MK wiring accessories can be mounted in a variety of MK trunking systems.

13A SOCKET OUTLETS

STANDARDS AND APPROVALS

13A socket outlets comply with BS 1363 Part 2:2016.

13A SOCKET OUTLETS

INSTALLATION

1 GANG SWITCHSOCKET – VIEW FROM REAR

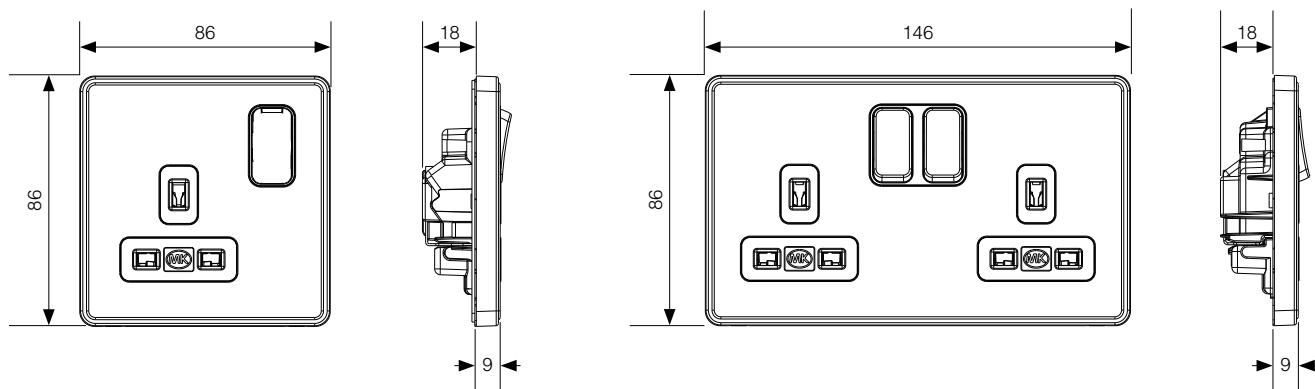

Top-facing, angled, backed-out terminals make wiring easier and quicker.

FEATURES

- Moulded 'on' indicator flash on plastic switches will not rub off – totally safe
- Optional neon indicators in the switch rockers with 175° visibility in the horizontal and vertical planes
- 3 pin operated safety shutter
- Printed terminal markings on grey rear mouldings for clearer identification
- Top access, angled terminals make wiring easier and quicker
- 3mm minimum switch contact gap
- Double pole switching
- Additional electrical safety from DP Switch, neutral 'make first', 'break last' feature
- Switch contacts with silver contacts on both surfaces for good continuity
- Only one size of screwdriver required for installation
- Dual earth terminals
- Backed out and captive terminal screws

WIRING DEVICES TECHNICAL

2 GANG SWITCHSOCKET OUTLET WITH INTEGRATED DUAL USB CHARGING CAPABILITY

STANDARDS AND APPROVALS

Standards and approvals MK DIMENSIONS
13A socket outlets and 2A USB charging outlets comply with BS 5733 and IEC 61558-2-16.

EMC Compatibility:
IEC 61000-6-1
IEC 61000-6-3

Products are CE marked and meet the requirements of the Low Voltage, EMC, RoHS and WEEE directives. (where relevant)

DESCRIPTION

A range of socket outlets designed for ease of installation and having all the advantageous design features of the MK range of wiring devices. Dual USB charging outlets offer end users easy access to power for charging a variety of devices such as smart phones, tablets and cameras.

FEATURES

- Moulded 'on' indicator flash on switches will not rub off – totally safe
- 3 pin operated safety shutter on 13A socket outlets
- USB 2.0 and 3.0 compatible
- Can charge a device at up to a full 2A
- If only one device is connected to a USB outlet the total output current of 2A is available from either outlet
- If two devices are connected to USB outlets the the total rated current of 2A is divided between the two outlets
- Differing manufacturers devices can be charged simultaneously via the two USB outlets
- If the total charging current exceeds the rated level of 2A then the device will enter a current limiting safety mode
- Electronically protected against an overload or short circuit on either USB outlet
- USB outlets are designed to provide optimum charging compatibility across a wide range of devices
- Printed terminal markings on grey rear mouldings for clearer identification
- Top access, angled terminals make wiring easier and quicker
- 3mm minimum switch contact gap
- Double pole switching
- Additional electrical safety from neutral 'make first', 'break last' feature
- Switch contacts with silver contacts on both surfaces for good continuity
- Backed out and captive terminal screws
- Dual Earth

1 x 6mm ²	
CONTACT GAP	4mm switch contact gap
PHYSICAL	
AMBIENT OPERATING TEMPERATURE	-5°C to +40°C
IP RATING	IP4X
MAX. INSTALLATION ALTITUDE	2000 metres

DESCRIPTION

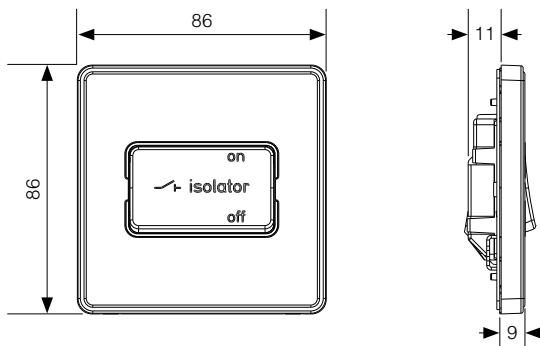

The MK Three Pole Fan Isolator provides a safe and simple method of isolating mechanical fan units and is particularly useful in bathrooms, toilets, storerooms and basements where there is little or no natural light. For example, timer controlled fans are often linked into the lighting circuit for energy saving and convenience. In such an installation there is often a need for the lighting circuit to remain live to provide light whilst the fan unit is externally isolated so that routine maintenance and repairs can be carried out in complete safety.

The fan isolator can be used as a double pole or triple pole isolator. In addition it includes a clear on/off indicator and the frontplate features a fan isolator symbol for easy circuit identification.

FEATURES

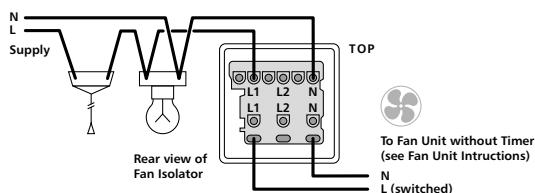

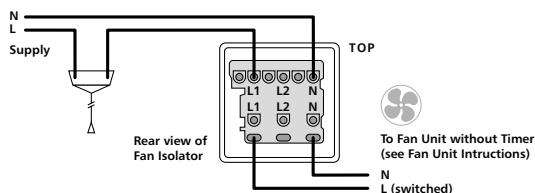

- Switchlock list no. K4858 is available to allow the isolator to be locked in the disconnected position to facilitate fan maintenance

DIMENSIONS (MM)

WIRING DEVICES TECHNICAL

SHAVER/TOOTHBRUSH SUPPLY UNITS

STANDARDS AND APPROVALS

Shaver/Toothbrush supply units comply with BSEN 61558-2-5:1998

Accommodates plugs as follows:

- BRITISH 5MM DIA PINS ON 16.6MM PITCH (230V SOCKET) TO BS 4573:1970
- EUROPEAN 4MM DIA PINS ON 17 TO 19MM PITCH (230V SOCKET) TO BS EN 50075
- AUSTRALIAN 6.5 X 1.6 FLAT BLADES EACH SET AT 30° TO THE VERTICAL ON A NOMINAL PITCH OF 13.7MM (230V SOCKET) AS/NZS 3112:2000
- AMERICAN 6.6 X 1.6 FLAT HORIZONTAL BLADES ON 12.7MM PITCH (115V SOCKET) TO UL498 / NEMA WD6

DESCRIPTION

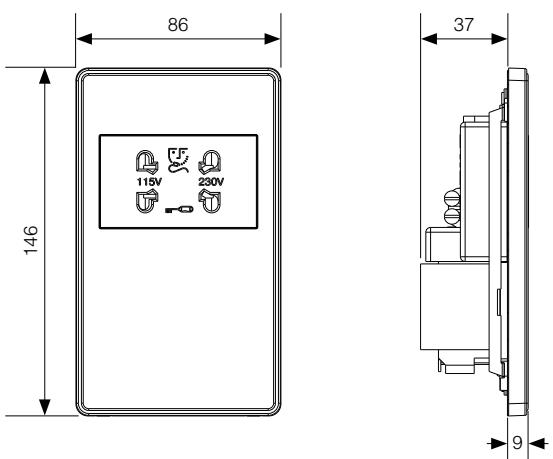

Designed for ease of installation and having many of the advantageous design features of the MK range of wiring devices.

May be used in bathrooms and washrooms – must only be installed in accordance with the latest edition of BS 7671.

FEATURES

- Top access terminal screws make wiring quicker and easier
- Automatic primary supply switching on insertion of plug
- Choice of 230V or 115V output socket positions
- Safety interlocked shutters to prevent insertion of two plugs simultaneously
- Only one size of screwdriver required for installation
- Front plate fixing screws retained on rear case moulding
- Integral over current device to protect transformer
- Suitable for use with electric toothbrush chargers

DIMENSIONS (MM)

INSTALLATION

Shaver/Toothbrush supply unit should be wall mounted.

IP RATING	IP2XD
MAX. INSTALLATION ALTITUDE	2000 metres

DESCRIPTION

A range of 13A fused connection units, 20A DP switches and 25A flex outlets designed for the connection of refrigerators, water heaters, central heating boilers and other fixed appliances. The ranges are designed for ease of installation and have the advantageous design features of the MK range of wiring devices.

Neon indicators

Products are available with Neon indicators included in the rockers of the switched connection units. In the case of unswitched units, they are positioned centrally and uppermost on the face plate. Neon indicators are integrally wired into the product and do not require separate connection when installing. The design gives 175° visibility in the horizontal and vertical planes.

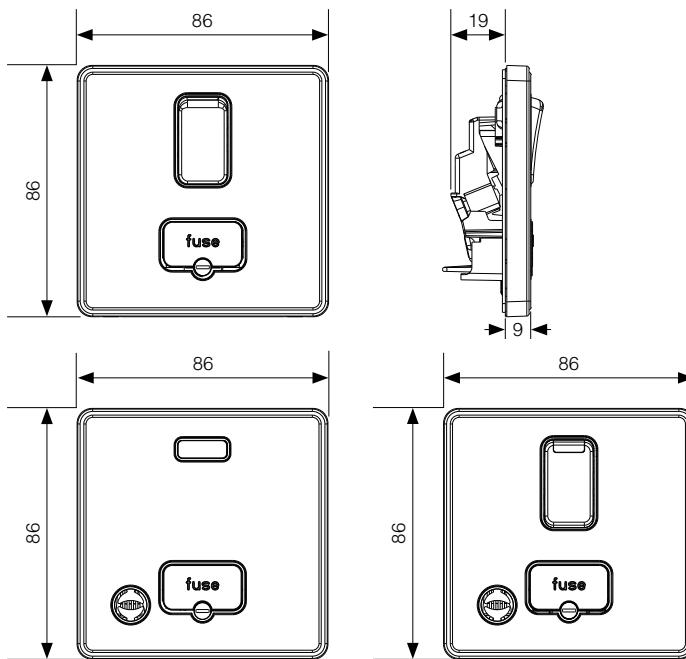

Fuse carriers

These are captive and are opened by a fast acting, screwdriver operated worm drive for ease of replacement. Fuse carriers can be locked open using a padlock.

Flex outlet

An unfused flex outlet with cord grip and 3 pairs of terminals.

DIMENSIONS (MM)

INSTALLATION

Wiring

Products must be installed in accordance with current IET Regulations.

Changing Fuses

1. Unscrew the fuse carrier screw to partially eject the carrier.
2. Carefully lever the carrier out further to remove the fuse.
Note: The carrier does not come fully out.

3. Always replace with a BS 1362 type fuse (as used in 13A plugs) of the correct rating.
4. Consistent fuse blowing could mean a faulty appliance. If in doubt, consult a qualified electrician.
5. Push carrier back until engaging with jacking screw. Screw the carrier down until flush with surface of the plate. Do not over tighten the screw.

WIRING DEVICES TECHNICAL

13A CONNECTION UNITS, 20A SWITCHES AND FLEX OUTLETS

FEATURES

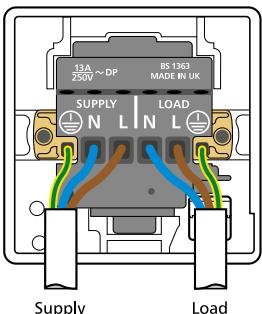

- | Optional indicators in the switch rockers with 175° visibility in the horizontal and vertical planes
- | Worm-drive operated fuse carriers for additional security
- | Fuse carrier lockable in open position
- | All supply and load cables can be cut and stripped to the same length
- | Integrally wired Neon indicators save installation time
- | Push-fit cord grips, for safer, quicker installation
(except 25A flex outlet)
- | Angled, top mounted terminal screws simplify wiring
- | Moulded 'on' indicator flash on switches cannot rub off – totally safe
- | Captive fuse carrier
- | Additional electrical safety from DP Switch, neutral 'make first', 'break last' feature
- | Secure cable and flexible cord connection
- | All terminal and fixing screws operated by one-size (4mm) screwdriver
- | Backed out and captive terminal screws

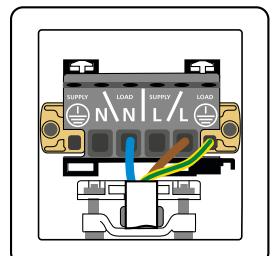

Front outlet cord grip

Lockable fuse carrier

Supply and non flexible load cables

Note: These switches are not recommended for switching large banks of PCs

MAX. INSTALLATION ALTITUDE
2000 metres

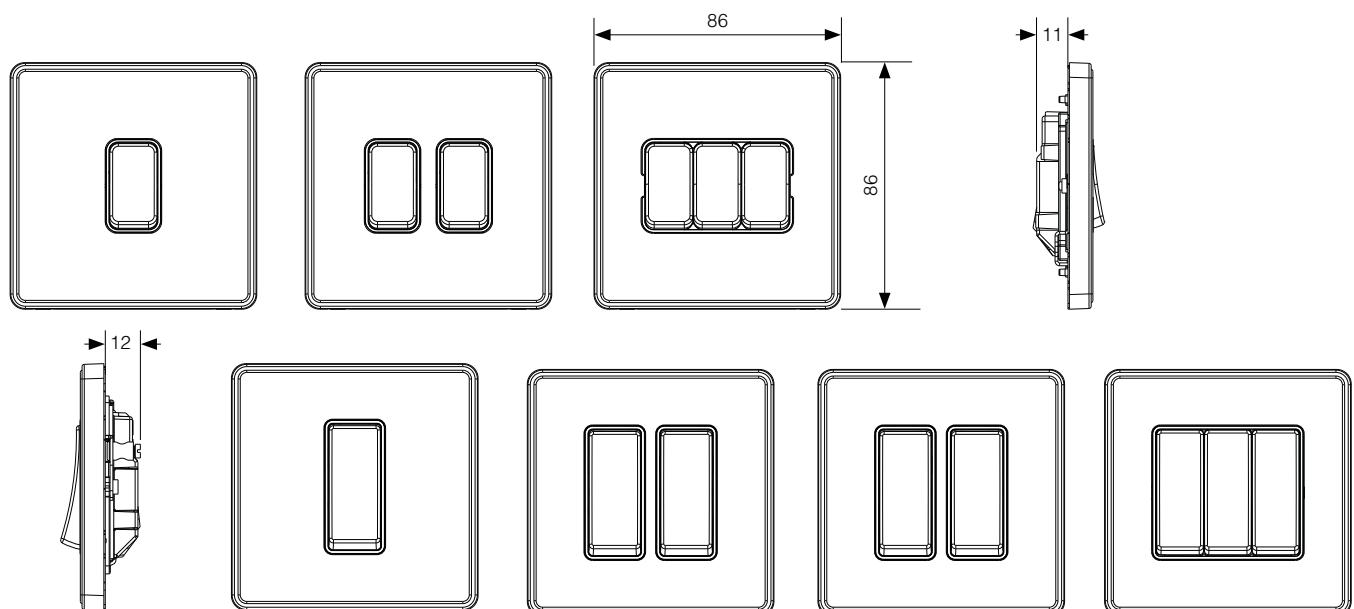

DESCRIPTION

MK plateswitches are designed to blend in with the decor, whilst complementing a wide range of other MK wiring devices. They are designed for easy installation in plasterdepth boxes and are suitable for controlling lighting circuits in domestic, commercial and industrial applications.

FEATURES

- Two way switches can be wired as one or two way
- Matching Grid switches available in 10 or 20A ratings
- 3mm switch contact gap
- Positive switch action
- Top access, backed out and captive terminal screws

DIMMER SWITCHES

STANDARDS AND APPROVALS

All CE marked MK DIMENSIONS dimmer switches comply with the EC Low Voltage Directive: 73/23/EEC, Electromagnetic Compatibility Directive 89/336/EEC

They also comply with
BS EN 60669-2-1 and IEC 60669-2-1
(LED Intelligent Dimmer only)

*Non-UK dimmer switches see note below

TECHNICAL SPECIFICATION	
ELECTRICAL	
MAINS SUPPLY VOLTAGE	230V a.c. (Nominal)
220V a.c. (Nominal, Non-UK)	
220V a.c. to 240V a.c. (For LED Intelligent Dimmer)	
MAINS SUPPLY FREQUENCY	50Hz
60Hz (MH1661* only)	
TYPE OF LOADS	
LED INTELLIGENT DIMMERS:	
Fused GLS Tungsten Filament lamps to BS EN 60064:1996 and BS EN 60432-1,2 rated at 230/240V. Dimmable wire wound or electronic Low Voltage Transformers of good quality. Can also be used with good quality mains voltage halogen lamps incorporating GU10 bases. Please check with lamp manufacturer to determine suitability.	
MH1523LV* and MH1524LV* are suitable for use with good quality dimmable LED lamps (10max). Due to market variability in LED lamp design it is advisable to check with lamp manufacturer to determine suitability. For best performance LED manufacturers lamps should not be mixed on one circuit.	
Note: Transformers must be suitable for use with leading edge dimmers.	
Warning: These dimmer switches are not suitable for use with Fluorescent Lamps or CFL Lamps.	
PHYSICAL	
AMBIENT OPERATING TEMPERATURE	0°C to +40°C
IP RATING	IP2XD
MAX. INSTALLATION ALTITUDE	2000 metres

DESCRIPTION

MK dimmer switches can fall into one of four categories

1. Non-UK Dimmer Switches
2. LED Intelligent Dimmer Switches

LED Intelligent Dimmer Switches

Dimmer Switches belonging to this category, employ the latest, state of the art, micro-controller based electronic circuitry and use current sensing to compute the load conditions. These products show progressive reaction to overload conditions, depending on the extent of overload as shown in the table below. List numbers belonging to this category are identified by the suffix letters LV. All MK Intelligent Dimmer Switches employ one pole change over switches to facilitate two way switching.

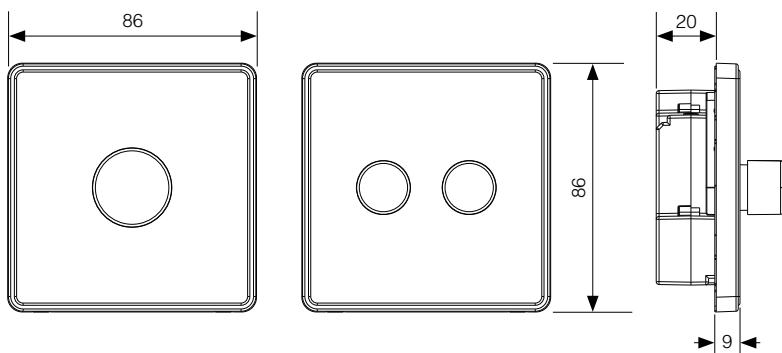

NOTE: MK LED Intelligent Dimmer Switches are not suitable for use with Fluorescent Loads, including CFL Lamps.

*Non-UK Dimmer Switches

Dimmer switches belonging to this category conform to safety and functional parts of BS EN 60669-2-1. Loads suitable for use with standard dimmer switches above are also suitable for use with this category of dimmer switch.

NOTE: Only one Dimmer Switch can be used in a two-way switching circuit.

MINIMUM BRIGHTNESS ADJUSTMENT FOR LED INTELLIGENT DIMMERS

The light output of some LED lamps may appear to be too dim or invisible when the dimmer knob is at the minimum dim level. Follow the steps below to adjust the minimum brightness level. This feature is primarily for adjusting the minimum brightness level of the LED lamp although it can be used for other load types.

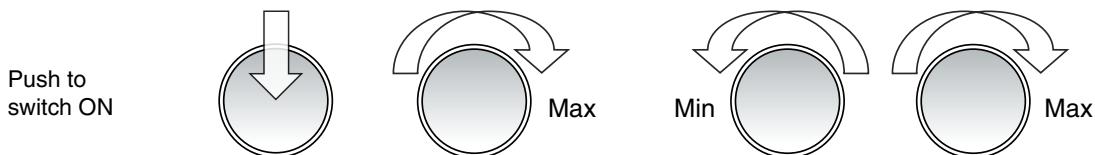

For a double gang dimmer, the light level of each gang has to be adjusted separately.

STEP 1 – ACCESS TO PROGRAMMING MODE

1. Push the dimmer knob so that it is in OFF state.
2. Set the dimmer knob to minimum level.

3. Turn on the dimmer and immediately rotate the knob 3 times in full rotary span within 5 seconds.

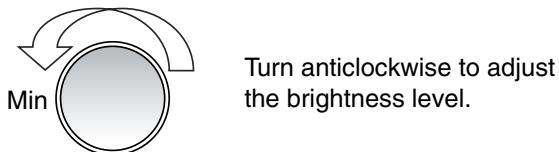

NOTE: Wait for 3 seconds, the lamp will then dim to minimum before automatically brightening to about 30% level.
 Turning/pushing the dimmer knob before the end of automatic brightening will end access to programming mode

4. Dimmer enters programming mode.

STEP 2 – ADJUST BRIGHTNESS LEVEL AND EXIT PROGRAMMING MODE

5. Rotate the dimmer knob anticlockwise to adjust the lamp to the desired brightness level.

NOTE: Some LED lamps may not work properly if the brightness level is set too low thus it is recommended to keep the brightness level of the lamp at a visible level. The dimmer will exit programming mode automatically without saving the new setting if there is no dimmer knob movement for 15 seconds. The dimmer will restore its factory default light level.

6. Confirm the new setting and exit programming mode by turning OFF the dimmer.

STEP 3 – SUCCESS INDICATION (PROGRAMMING COMPLETE)

7. The next time the dimmer is turned on the lamp will automatically brighten to the maximum level before dimming to the brightness level corresponds to the knob level.

DIMMER SWITCHES

FEATURES

Intelligent and LED Intelligent Dimmer Switches

incorporate the following advanced features

- Suitable for dimming Low Voltage Halogen lamps via good quality, fully dimmable electronic or wire-wound transformers. In addition, LED Intelligent dimmer switches are suitable for dimmable LED bulbs for incandescent replacement.
- Can be used with good quality mains voltage halogen lamps incorporating GU10 bases. Please check with lamp manufacturer to determine suitability
- Load current sensing:
These dimmers continuously monitor the load current to help protect against overheating in wire wound transformers and to prevent overloading of the dimmer for long term reliability

- Soft Start, which gradually increases the light output from the load over 1 to 3 seconds after switch on. The Soft Start feature is also particularly beneficial when used to dim Mains Voltage Tungsten Halogen lamps which inherently have a very high inrush current at switch on

Standard Dimmer Switches

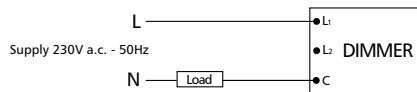

- Suitable only for use with fused GLS Tungsten Filament lamps to BS EN 60064 and BS EN 60432-1
- One way dimmer switches incorporate manual soft start
- Incorporate thermal switches for protection against overload

LOAD TYPES AND LOADINGS						
DIMMER SERIES	DIMMER SIZE (1 GANG)	RATING			MAX NO. OF TRANSFORMERS AND LEDs (TOTAL RATING MUST NOT EXCEED MAX.VA RATING OF DIMMER)

DESCRIPTION

A range of combination plates designed for ease of installation and having all the advantageous design features of the MK DIMENSIONS range. These combination socket outlets provide interior designers and installers with a stylish and practical wiring device solution.

Note:

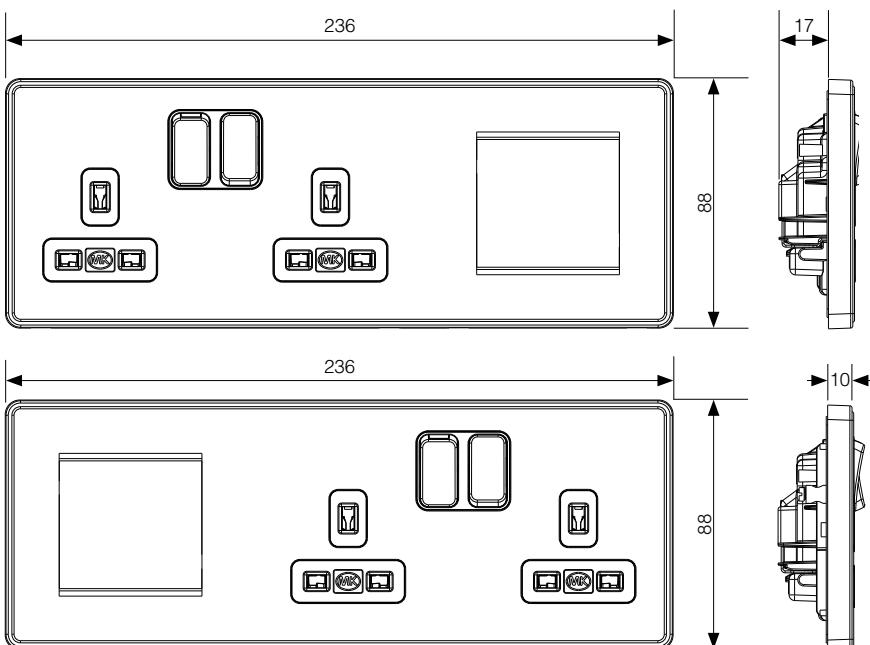

- Pre-configured back boxes are designed for use with the combination plates. These back boxes should always be used to ensure alignment of the fixing screws is correct and proper segregation between mains and extra low voltage products is maintained
- Mains operated products and extra low voltage modules must not be installed within the same frontplate aperture. Refer to BS 7671: for details
- When removing the fixing screws and frontplate from an installation to gain access to low voltage modules, please be aware that there will also be access to the mains supply

All pre-fitted sockets come complete and are fitted with two earth terminals on a common busbar to provide a double earth facility for use when installations require a high integrity protective connection as specified within BS 7671, IET Wiring Regulations.

OPERATING FREQUENCY:
868.3 MHz

IP RATING
IP2X

MAX. INSTALLATION ALTITUDE
2000 metres

DESCRIPTION

The MK DIMENSIONS Echo™ Transmitters are part of an innovative range of entirely wireless, batteryless and self powered switches. The MK DIMENSIONS Echo™ Transmitters communicate with Echo™ receivers to switch mains power.

MK DIMENSIONS Echo™ Transmitters send an RF signal at 868.3 MHz, the unique feature of these transmitters is the signal transmission is made with no need for mains power or batteries.

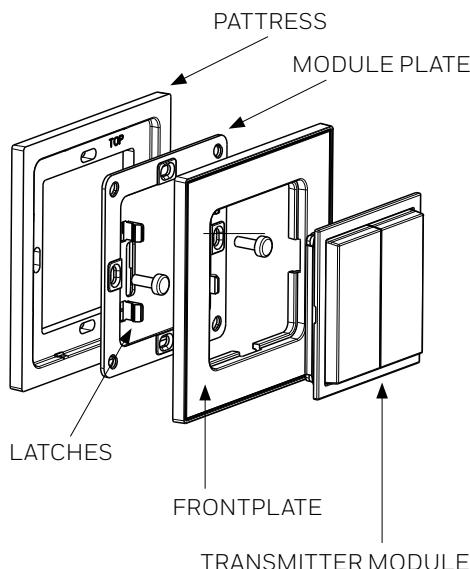

FEATURES

- Wireless and batteryless, using RF technology with ranges up to 30M in ideal conditions
- The transmitters are quick and easy to install with no need for cabling from the switch to the lighting circuit
- See the Echo range for available receivers

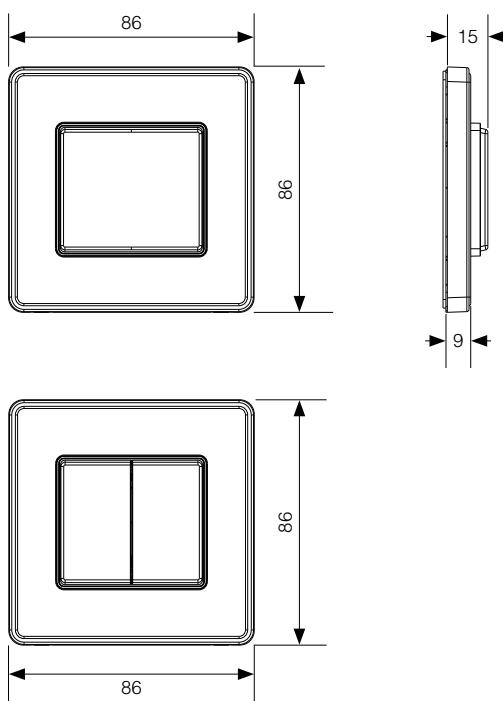

MOUNTING TRANSMITTERS

- ALL TRANSMITTERS CAN BE MOUNTED TO ANY 1 GANG BACK BOX
- ALL TRANSMITTERS CAN BE MOUNTED DIRECTLY TO THE WALL SURFACE
