

EN54-23 Made Easy

This CPD from Honeywell Gent provides a comprehensive overview of the new EN54-23 regulations for selecting and designing visual alarm devices (VADs).

Duration - 1 hour

Who should attend - Risk Assessors, building management, designers, installers and maintainers of fire detection and alarm systems

External Approval - CPD Service

Course details

During the session you will gain an understanding of the key drivers of this new standard and what has changed since its introduction. You will also see some standard examples of when Visual Alarm Devices (VADs) should be used and selecting the right devices depending on the environment. You will also gain knowledge of how the standard has been incorporated into BS5839 pt 1 and what tools are available to make life easier for designers.
