Indoor Specialist Activation Devices
Rockerswitch model 9200

> ## Product Benefits

- Variety of rockerswitch devices available

- Suitable for Fire, Security & Other Specialist Applications

- Variety of colours and markings

Product Overview

The KAC Class 9000 range of devices provides you with the most comprehensive range of switching product solutions for fire, security and other specialist applications.

All products comprise a main housing and escutcheon plate. The switching device is fitted to the plate, which simply snaps into the main housing and is permanently located into place by fixing screws.

As with our market leading range of call points, all switching devices can be supplied in our core colours of red, green, white, yellow and blue. There are also numerous function marking options available to meet your specific requirements.

The rockerswitch family forms part of the Class 9000 range and can be supplied in three principle versions: -
- Two positions (marked '1' and '0'), with double pole contacts (see figure 1 for contact arrangement).
- Three positions (marked '0', '1' and '2' with two sets of three contacts. No inter-contact in centre '0' position, alternate connections made in positions '1' and '2' (see figure 2 for contact arrangement).
