Product Announcement: HyperSpike® Long Range Speakers Now Available from System Sensor
May 2022

System Sensor is pleased to announce a partnership with HyperSpike® that brings their line of TCPA-10 and LineWave speakers to the System Sensor audible visual (AV) notification portfolio. HyperSpike speakers offer revolutionary sound quality and intelligibility for fire and life safety applications and their innovative designs exceed the highest standards in military and acoustic notification markets.

Advantages of the HyperSpike offering include:

- Industry leading voice intelligibility
- Powerful acoustic coverage
- Lightweight, compact speakers
- Precisely engineered amplification options
- Simple and quick installation
- Cost effective solutions

The HyperSpike TCPA-10 loudspeaker is engineered to cut through high ambient indoor and outdoor environments with clear and authoritative audio signals and voice notification. The TCPA-10 is UL 1480 Listed, weighs only 9 pounds and provides up to 45 watts of output at 139 dB making it the smallest high powered speaker in the market approved for fire and life safety applications. With best-in-class voice quality and intelligibility, combined with sharp and high impact tone capability, the TCPA-10 is the right choice for large indoor and outdoor voice applications such as schools, manufacturing facilities, warehouses, airports, arenas/stadiums, and parking structures.

The HyperSpike LineWave is a full-range line of speakers that provide 2, 4, 8 or 16 speaker arrays for challenging acoustic environments. The LineWave speakers are also UL 1480 Listed and are engineered to produce clear and authoritative voice commands and powerful tones within reverberant environments. They also control vertical dispersion by focusing sound away from reflective surfaces and aiming the sound where needed – at the listener's ears. The result is clear and intelligible direct sound that ensures critical messages are heard and understood.

The new HyperSpike TCPA-10 and LineWave speakers and associated accessories are available to order now!
Please contact your preferred System Sensor authorized wholesale distributor for ordering and pricing information or visit systemsensor.com for more information on the HyperSpike TCPA-10 and LineWave.

Thank you for your business and continued support of System Sensor products.
