

SMARTER BUILDINGS ELEVATED SECURITY ONE CONNECTED PLATFORM

Your critical operations unified into a
single view

Honeywell

Take your building's operations and security to the next level with Honeywell Enterprise Buildings Integrator (EBI), now integrated with the LenelS2 OnGuard access control solution. This powerful combination brings building automation, alarms and events into one intelligent platform.

Operators can now monitor and respond to security and building events in near real time—simplifying operations, enhancing occupant safety and improving situational awareness.

WHY INTEGRATE HONEYWELL EBI AND LENEL S2 ONGUARD?

INTEGRATED BUILDING MANAGEMENT

Unify building operations and security monitoring within one connected platform.

- **Real-time Monitoring and Alerts:** View alarms and events as they happen, improving response times and situational awareness.
- **Predictive Analytics:** Gain insights from integrated building and security data to help optimize energy management, detect anomalies and drive smarter decisions.
- **Scalable and Adaptable:** Right-size your operations as business needs shift while maintaining clarity and control.

CENTRALIZED SECURITY

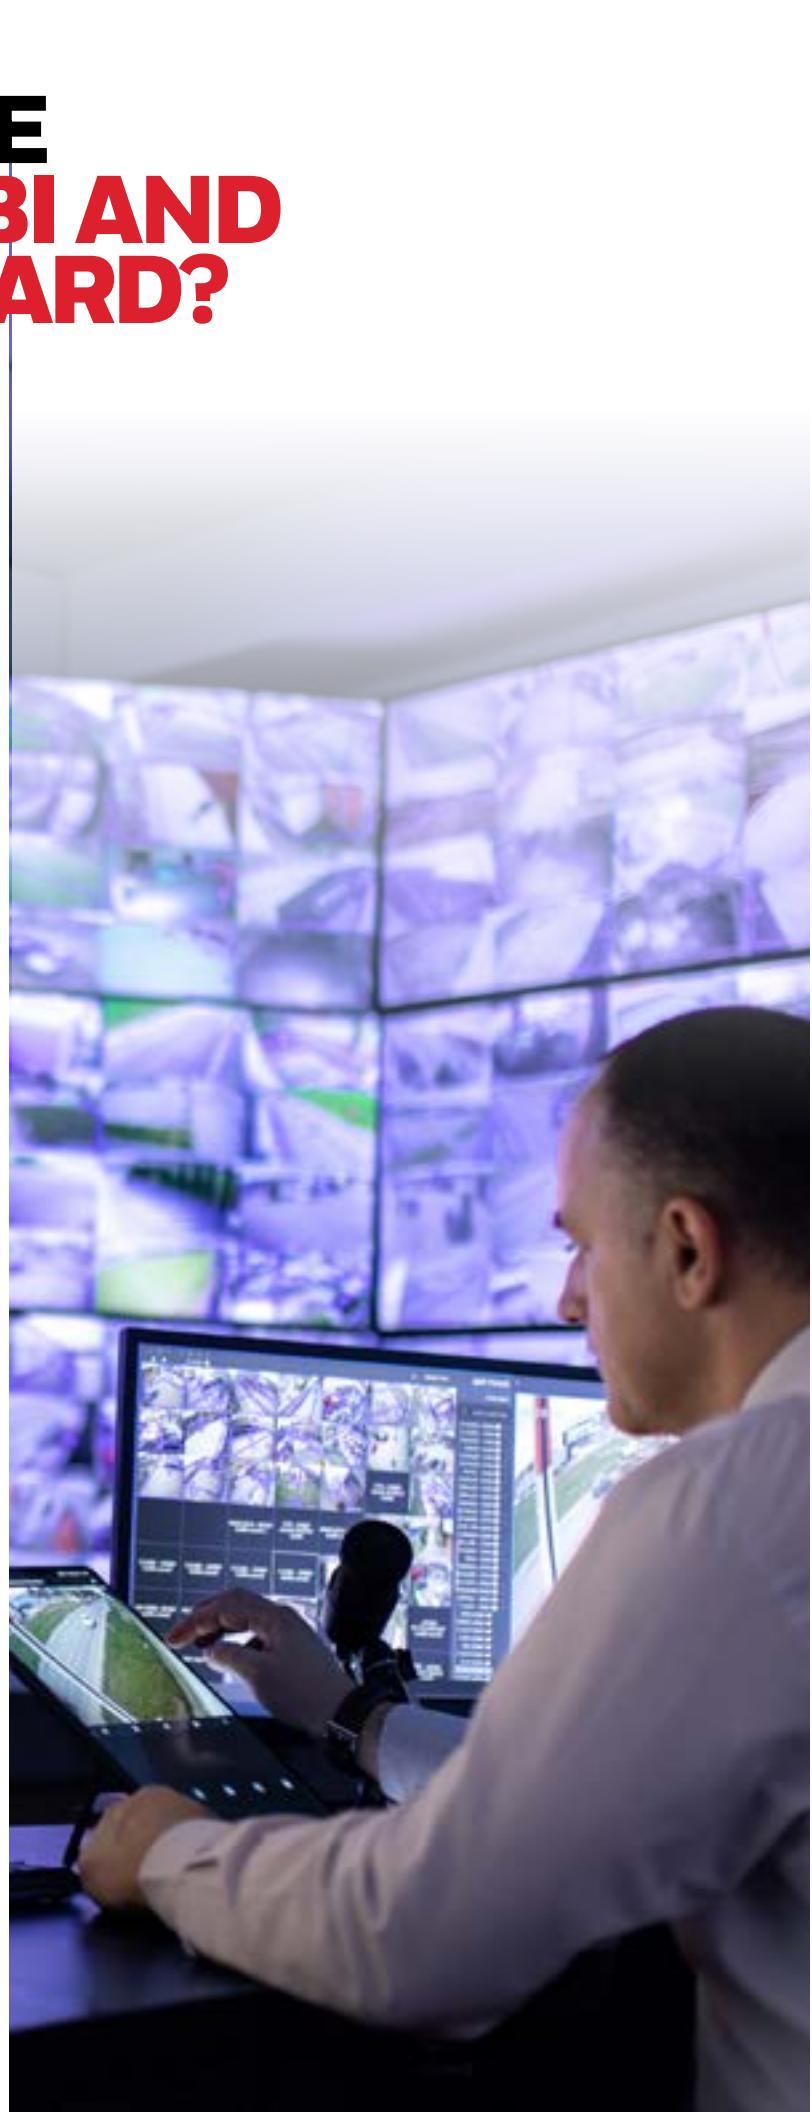

Bring together building alarms and events into one cohesive view.

- **Coordinated Response:** Link security and operational events to streamline incident management and reduce downtime.
- **Integrated Event Reporting:** Access a unified stream of alarms and activity logs to improve transparency and compliance.
- **Enhanced Protection:** Strengthen building resilience by connecting physical access events with system alarms and environmental data.

UNIFIED VIEW OF OPERATIONS

Experience simplicity through one powerful dashboard.

- **Unified Visualisation:** Monitor and act across building systems from a single source of truth.
- **Improved User Experience:** Reduce operational complexity with a centralized, map-based view of all alarms and events.
- **Audit and Compliance Reporting:** Generate comprehensive reports to support regulatory compliance and stakeholder visibility.

THE POWER OF INTEGRATION IN ACTION

By bringing the best of both systems together, this integration leverages the proven strengths of Honeywell EBI and LenelS2 OnGuard. Learn more about how OnGuard, when integrated EBI, enables smarter, faster and more secure building operations.

Capability	Honeywell EBI Features	OnGuard Brings	Benefits of Integration
 Access Control	Supports full Physical Access control features via native controller level or App level integration	More choice and flexibility with advanced identity lifecycle management, frictionless access, smart cards, biometrics	Adds depth, choice and flexibility to centralized identity management and credentialing
 Alarm Management	Supports Advanced alarm and Incident management for life security, life safety and all Building Management systems and enables context based situation management	Security-focused alarm workflows and incident response	Enables security-specific escalation and incident management
 Security Integrations	EBI supports multiple visitor management systems including cloud enabled Sine by Honeywell Visitor Management system	Native visitor registration and mobile credentialing	Streamlines guest access with security oversight
 Compliance and Certifications	Building-focused (e.g., UL fire standards)	Federal, DoD, and SCIF certifications	Meets high-security and government standard

UNLOCK CLARITY AND RESPOND FASTER

For tenants and building operators, the Honeywell EBI integration with LenelS2 OnGuard helps deliver a more secure and operationally efficient environment that empowers smarter decisions and near real-time visibility with outcomes that include:

- Consolidated alarm and event monitoring within a single platform for real-time awareness and more accurate consistent reporting
- Faster incident response through unified visibility across building and security systems
- Streamlined workflows that help reduce manual effort and help improve cross-functional collaboration
- Enhanced building and situational awareness that supports proactive decision-making and helps improve occupant safety

EXPERT DEPLOYMENT AND SERVICE

The Honeywell EBI and LenelS2 OnGuard Integration is powered by Honeywell's in-house team of experts, who provide best-in-class project management and deployment services, enabling your Integrated Building Operations system to run smoothly from day one.

Elevate your building management with Honeywell EBI and LenelS2 OnGuard—where security and building management are controlled through a single unified view.
