**Product Discontinuation:** 30 Series 5MP Fisheye Camera – HC30WF5R1  
**Product Replacement:** 35 Series 6MP Fixed Fisheye Camera – HC35WF6R1

## 30 Series Fisheye Camera Discontinuance

At Honeywell Commercial Security, we endeavor to provide the most innovative and latest video technology products to our customers. In doing so, sometimes it is necessary to discontinue products to make room for newer products with latest technology.

This bulletin is to advise of the discontinuation of the 30 Series 5MP fisheye camera, effective immediately. The replacement product is the new 35 Series 6MP fisheye camera which has:

- Better low-light performance (0.008 Lux @ (F2.0, 30 IRE)),
- Enhanced resolution at 5MP (2560x2560 @30fps),
- 3 x increased video storage on SD card at 1TB and
- 9 additional built-in video analytics including: Smart Motion, Scene Change, Intrusion, Multi-loitering, People Count, Face Detection, Line Crossing Detection, Unattended Object Detection, Missing Object Detection, and Heat map.

First inventory of the new 35Series 6MP Fisheye will be arriving end of March.

Basic technical support will continue as per the warranty period which is 5 years from date of manufacture. Please note that for 30 Series units found defective under warranty, Honeywell will repair or replace with similar product model, the 35Series 6MP Fisheye Camera.

Thank you for your continued loyalty and partnership.
