

IT'S TIME TO EXPECT MORE FROM A FIRE DETECTION SYSTEM

THE PATHWAY TO YOUR CONNECTED BUILDING

The Honeywell Connected Life Safety Services (CLSS) platform puts visibility at the heart of life safety, providing you with real-time data to help you make the right decisions at the right time to improve your productivity. Connect, monitor and act to manage your entire installed base.

UNIVERSAL COMPATIBILITY

- Support of any alarm system panel via dry-contact connectivity
- Give clear information to your customers staff with site, input channel events with labels fully configurable per profile
- Connect critical infrastructure services to CLSS such as conventional fire panels, extinguishing systems, gas detection, auxiliary devices, PA/VA etc.

INCREASE YOUR RMR

By utilising the connectivity of CLSS Pathway, you will be able to increase your recurring revenue to sites with the ability to generate live reporting of all critical systems connected to the CLSS Site Manager and Mobile App. You could charge more for recurring monthly monitoring via cellular/IP – giving your customers a better, more reliable service that costs them less.

DIFFERENTIATE YOUR SERVICE

When connecting your customers to CLSS Pathway, you're delivering more than just a best-in-class monitoring service. You're also providing them access to benefits like digital inspection reports, system visibility across sites, and remote diagnostics. This is a premium offering – charge for it!

PATHWAY KEY HIGHLIGHTS

Dual-Path

IP and Cellular communication capable

Dual-SIM

Lower inventory costs with a single device that supports multiple operators per country

Universal Compatibility

Works with anything installed which has a dry contact output

HW-LTE-M-EN54 on 5G spectrum

Maximises speed and coverage. Reduce installation costs by bypassing remote antennas

INDUSTRY LEADING SOFTWARE

DIGITAL TEST AND INSPECTION REPORTS

Test and Inspect software allows you to deliver digital inspection reports before leaving your customer's premise

CUSTOMER PEACE OF MIND

Facility Manager gives your end users visibility into system status across sites as well as real-time event alerts via desktop or Mobile App

REAL-TIME VISIBILITY

Site Manager provides you with a live view of your accounts, allowing you to diagnose problems before you arrive, reducing unnecessary trips and improving first-time fix rates
