

THE PATHWAY TO A MORE PROTECTED BUILDING

Modernise your building connectivity with the Connected Life Safety Services (CLSS) Pathway

The Honeywell Connected Life Safety Services (CLSS) platform puts visibility at the heart of life safety, providing you with real-time data to help you make the right decisions at the right time to improve your productivity. Millions of alarm systems are not monitored or monitored through old and separate systems. In case of emergencies, centralised, visual and simple information is critical to make the best decision.

Connect, Monitor and Act to manage your entire installed base with CLSS Pathway

INCREASED AWARENESS AND COMPLIANCE

We can give you access to the CLSS Facility Manager app which provides insight into scheduled system testing, digital inspection reports, device inventory, and more. See what's happening across your sites on one single platform.

A MORE RELIABLE CONNECTION

The CLSS Pathway establishes a more reliable connection from your buildings to the monitoring centre with dual-sim support and dual-path communication.

There's a better way to connect your building
- the CLSS Pathway is available now.
