

Product Announcement: Addressable Fire Alarm Control Panels with Built-In Cellular Communicator and CLSS Cloud Connectivity Now UL and ETL Listed

June 2025

Fire-Lite Alarms is pleased to announce the latest update to our addressable fire alarm control panel (FACP) family designed to give fire safety professionals more options for protecting small to medium-sized buildings. The Fire-Lite ES-XP Series, including the ES-50XP and ES-200XP, offers a complete turn-key fire safety solution by combining the dependable ES Series of addressable FACP's with a built-in dual path (cellular/IP), dual SIM (AT&T/Verizon) and dual listed (UL/ETL) 5G LTE-M CLSS Pathway Pro communicator. This combined solution reduces installation and labor costs with an all-in-one solution, enables faster and more reliable central station reporting and provides complete line of site monitoring plus access to automated test and inspection reporting through Honeywell's Connected Life Safety Services (CLSS) cloud solutions.

As an integrated communicator, the CLSS Pathway Pro can transmit signals to central stations up to 40 seconds faster than legacy dialer capture or legacy POTS communication methods primarily used in the market. In addition, the dual path (cellular/IP) and dual SIM (AT&T/Verizon) connectivity options of the CLSS Pathway Pro provide exceptional redundancy for increased reliability and peace of mind with every installation.

The CLSS Pathway Pro also provides access to Honeywell's cloud-based software tools including:

- **CLSS Central Station Alerting** provides code required transmission of fire alarm control panel events to central monitoring stations.
- **CLSS Site Manager** provides a "bird's eye" view of all your accounts and real-time information on event generation so you can diagnose before dispatch. Reduce unnecessary trips & improve your first-time fix rate.
- **CLSS Facility Manager** provides end users with event alerts via browser or mobile app and access to asset information across multiple sites.
- **CLSS Contextual Information for First Responders** shares contextual alarm information from the fire panel with first responder applications.
- **CLSS Compliance Manager** allows you to deliver digital inspection reports before leaving a customer's site.

The Fire-Lite ES-XP Series is available to order now! Please contact your Customer Service Representative at Fire.orders.us@Honeywell.com to order and visit firelite.com or hwll.co/pathway for more information.

MODEL NO.	DESCRIPTION
ES-50XP	50-POINT ADDRESSABLE FACP WITH CLSS PATHWAY PRO IP/CELL COMMUNICATOR
ES-200XP	198-POINT ADDRESSABLE FACP WITH CLSS PATHWAY PRO IP/CELL COMMUNICATOR

Thank you for your business and continued support of Fire-Lite Alarms and CLSS products.
