Product Update: MS-2-L8 and MS-4 Conventional Fire Alarm Control Panels

Please be advised that the following Fire-Lite Alarms conventional fire alarm control panels have recently been impacted by component constraints. As a result, the following models have been discontinued effective immediately:

PART NUMBER	DESCRIPTION	STATUS
MS-2-L8	2-ZONE CONVENTIONAL FIRE ALARM CONTROL PANEL	DISCONTINUED
MS-4	4-ZONE CONVENTIONAL FIRE ALARM CONTROL PANEL	DISCONTINUED; LIMITED SUPPLY REMAINS

The suggested replacements for the discontinued models are the **MS-5UD-3** (5-zone) and **MS-10UD-7** (10-zone) conventional fire alarm control panels.

Please note that all existing orders for the MS-4 at the time of this announcement will be fulfilled and a limited supply remains available on a first come, first served basis, while supplies last.

Fire-Lite is actively working on the next generation of conventional panels that build on the strengths of the MS platform while also incorporating the latest innovations and enhancements. Please stay tuned for future updates and announcements.

Thank you for your business and continued support of Fire-Lite Alarms products.
