

COORDINATED OPERATIONS DRIVE OPERATIONAL SUCCESS

Improve the life safety and security, energy management, and operational efficiency of your building with unified data and automation from Honeywell Integrated Operations

The Honeywell Integrated Operations Platform

Honeywell

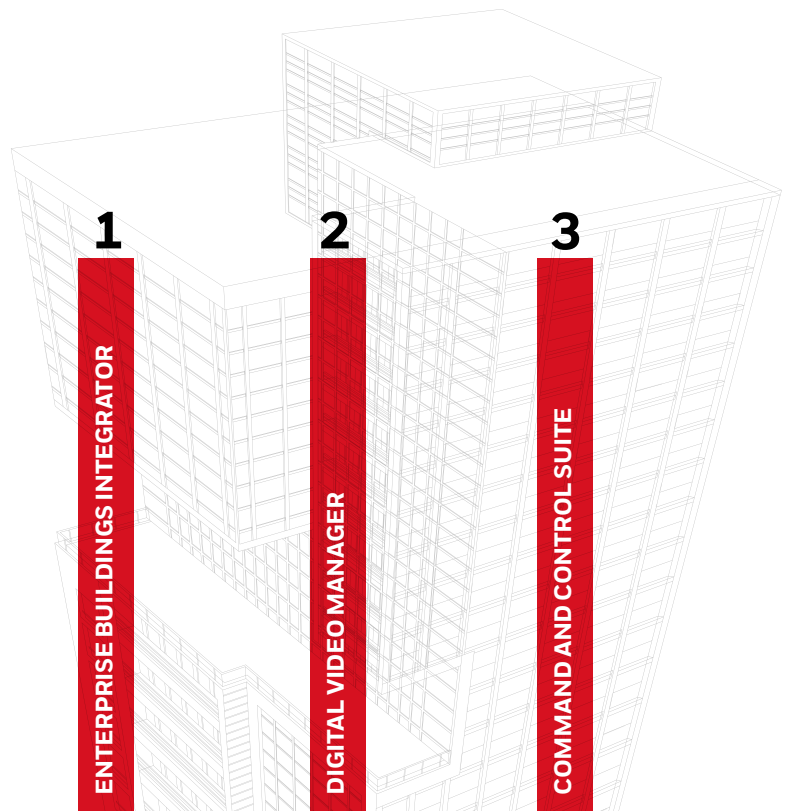

TRANSFORM BUILDING DATA INTO OPERATIONAL OUTCOMES

By connecting your site's data with the people who use it, your building becomes a powerful driver of strategic outcomes like operational efficiency and energy savings.

The Honeywell Integrated Operations platform accelerates this transformation with capabilities that automate workflows, optimize energy use, safety, and occupant experiences, and deliver enterprise-wide savings through actionable insights.

INTEGRATION VISIBILITY COORDINATION

These are the three pillars of better operational outcomes. Honeywell Integrated Operations helps you achieve these capabilities through a suite of systems that work together to deliver the types of strategic outcomes that can revolutionize your building's capabilities.

HONEYWELL INTEGRATED OPERATIONS

INTEGRATE: ENTERPRISE BUILDINGS INTEGRATOR

Get essential insights across systems – then automate the details. That’s what makes Honeywell Enterprise Buildings Integrator (EBI 2025) the system of choice for integrating and operating complex facilities and critical operations around the world, from airports and healthcare facilities to some of the world’s most iconic buildings.

EBI 2025 provides the next generation of control, performance and cybersecurity to upgrade outcomes throughout your site.

VISUALIZE: DIGITAL VIDEO MANAGER

Honeywell Digital Video Manager (DVM 2025) gives you smart video systems built on a resilient platform that’s designed to integrate new capabilities, such as the latest IP cameras, video analytics and encryption, so you can more effectively maintain vigilance and mitigate risk while enhancing the efficiency and safety of your operations.

DVM 2025 optimizes your oversight using robust analytics and smart map-based visibility across your site.

COORDINATE: COMMAND AND CONTROL SUITE

As a core part of the EBI user experience, the Command and Control Suite (CCS) makes critical information more accessible with a touch-optimized geospatial map interface that gives your operators powerful, intuitive control of your site.

CCS helps operators respond with greater accuracy and fewer clicks, using new automated workflows and a faster “single pane of glass” experience across building systems.

OPTIMIZE PERFORMANCE

Use automated workflows to enable greater efficiency
Gain real-time monitoring with intelligent alerts and security

IMPROVE STABILITY & CYBERSECURITY

Protect operational technologies (OT) with latest encryption and cybersecurity
Improve stability with extensive Microsoft compatibility

MANAGE REMOTELY

Manage multiple sites from anywhere with secure cloud access or via your own cloud solution
Improve performance with updated Microsoft compatibility

SUPPORT ENERGY SAVINGS

Support energy savings and performance benchmarks like LEED certification with Energy Manager

INCREASE VISIBILITY

Enhance situational awareness with smart streaming of multiple cameras by map location
Monitor and respond on the go with platform-agnostic client options

RESPOND FASTER

Respond with greater speed, focus and accuracy using an intuitive map-based interface
Leverage deep security integration with your physical security information management (PSIM) system

LEVERAGE RESILIENT STORAGE & PERFORMANCE

Protect camera views and recordings with multi-layered redundancies
Enhance credibility with watermarked, digitally signed video evidence

GO BEYOND SECURITY

Extend visibility beyond security with actionable insights into operations
Improve preventive safety and maintenance, as well as management and workflow efficiency

USE GEOSPATIAL MAP-BASED CONTROL

Gain fast, intuitive access to systems and data with new map interface
Inspect or take control of your facility

IMPROVE CONSISTENCY FOR INCIDENT WORKFLOWS

Use standard operating procedures to standardize and improve responses
Enable fast, smooth interactions with timeline and map integration

INCREASE PRODUCTIVITY

Map interface displays details only as needed for faster use, comprehension and training
Control cameras, doors, and more with smart objects on the map

DEMONSTRATE COMPLIANCE

Preserve each step operators take with digital recordings of the process
Accelerate post-incident analysis with automated reporting

Reimagine what your building can do
