

## ***OS500 In-Room Safe with Keypad and Audit Trail***

The Onity OS500 in-room safe is an excellent choice for hotels looking for a reliable safe designed to securely store laptops, tablets, purses or other valuables. A backlit LED button push is guest friendly, with 3, 4, 5, or 6-digit PIN code options.

The OS500 safe comes in traditional design with a front-opening door and is available in black. It comes with two solid steel, anti-drill rotating bolts to mount to a shelf, cabinet, wall, desk or floor and features an on-screen low battery warning and audit tracking.

The OS500 includes a safe on hold function to prevent unauthorized access. If an incorrect code is entered four consecutive times, the safe will enter a shutdown, or hold, status for a programmable number of minutes.

**OS500**
