

# Mobile Security Professional

## Overview

Mobile Security Professional® is an app for iOS and Android devices that allows both management and staff to operate their NetBox™ access control and video management systems from anywhere. Users can switch between separate systems or partitions directly in the app. Mobile Security Professional is administered from a central location, and all actions are instantly displayed at the command center.

With Mobile Security Professional, mobile staff can review surveillance video, monitor events and alarms in real time and manage evacuations. Cameras are accessible on demand, displaying high-quality, high frame rate video. Video snapshots can be shared as needed. In response to event activity, staff is able to take immediate action such as remotely opening related doors and identifying a person of interest in video. Mustering for evacuations is effortless, with multiple mustering points coordinated right on the screen. Mobile Security Professional dramatically improves productivity, decision making and response time.

*Door Controls: Users can momentarily unlock doors as well as view live video and recent access history associated with portals.*

## Key Features

### System

- **Mobile App:** Allows for operation of distributed NetBox access control and video management systems on iOS or Android devices
- **Multi-System Control:** Includes the ability to switch between separate NetBox systems or partitions
- **SSL Support:** Provides encrypted communications between Mobile Security Professional and the NetBox controller

### Mobile Security Management

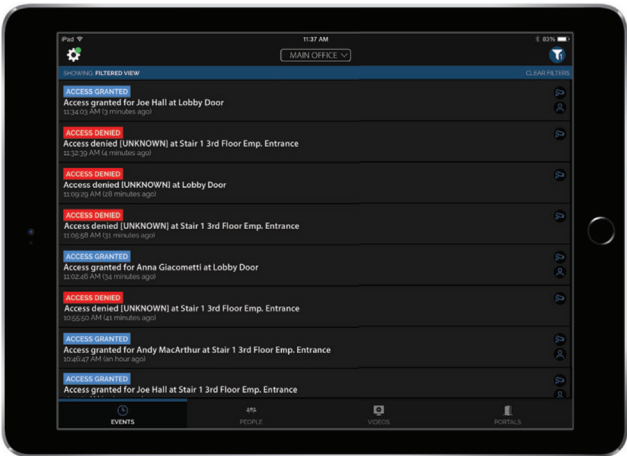

- **Video Surveillance:** Delivers live video and event-based videorecording from any VRx or NetVR™ camera
- **Video Snapshot:** Allows sharing of critical images via email or text message
- **Event Monitoring:** Displays event activity and video of interest, both real time and recorded
- **Person Detail:** Provides person identification and their access history log in one touch
- **Door Controls:** Enables momentary unlock of any door in the system
- **Evacuation Management:** Tracks evacuations and allows for management of multiple mustering points
- **Notifications:** Provides ability to send notifications to Mobile Security User app users

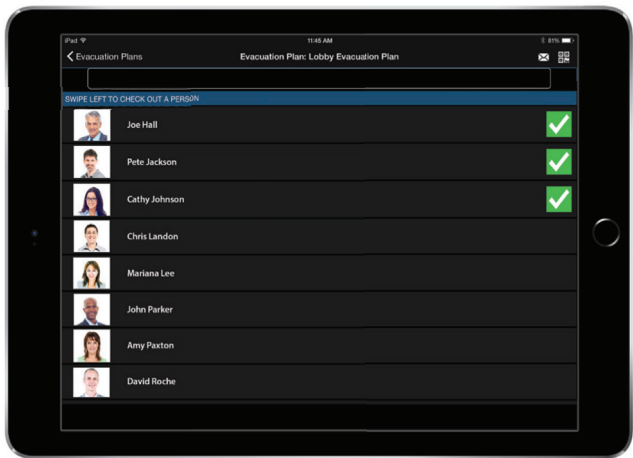

*Video Surveillance: Mobile users can access VRx or NetVR cameras on demand and view live video in full screen mode.*

# Specifications – Mobile Security Professional

Access Control	
NetBox Software	Version 5.2 and later
Video Management	
VRx Software	Version 5.2 and later
NetVR Software	Version 1.8 and later
Camera Stream Layout	Single cell
IP Camera Resolution	Camera dependent
IP Camera Frame Rate	Camera dependent
Client Requirements	
Operating System	iOS 10 and later; Android 4.4 and later
Product Sourcing	
App Download	Free download from Apple App Store and Google Play

Event Monitoring: Mobile Security Professional displays all event activity and allows users to view video of interest with one touch.

Evacuation Management: With one touch, mobile staff can account for individuals at mustering points.
