SUSP Quote (OnGuard)

Supplemental Agreement

Support Agreement for Software Upgrade & Support Plans (SUSP).

PLEASE NOTE: This Agreement is a supplement to the LenelS2 Value-Added Reseller (VAR) Agreement.

Corporation Channel Partner (SP) Agreement which terms and conditions apply to the procurement of services under this Support Agreement. By issuing a purchase order or making payment for the quoted services as described in this Support Agreement, VAR agrees to and accepts the terms and conditions contained in this LenelS2 Support Agreement.

A quote with pricing and term for services provided hereunder will be provided with this Agreement. Payment in full is due after VAR's receipt of the invoice for the System ID(s) identified in the quote.

Lifecycle

Product	Release Version	Release Date	End of Support
OnGuard®	8.3	October 2024	October 2027
OnGuard®	8.2	June 2023	June 2026 (*)
OnGuard®	8.1	June 2022	June 2025 (**)
OnGuard®	8.0	January 2021	January 2024
OnGuard®	7.6	December 2019	December 2023
OnGuard®	7.5	December 2018	December 2021
OnGuard®	7.4	December 2017	December 2020

Product version includes all production releases and updates

(*) End of Support OG 8.2 will be extended from June-2026 through December 2026

(**) End of Support OG 8.1 will be extended from June-2025 through December 2025

Product version includes all production releases and updates.

Eligibility

Support Plans that have lapsed are eligible for renewal at the currently published LenelS2 VAR Price Book rates. The renewal date will be retroactive to the original expiration date; therefore, a support plan must be purchased for each year of lapsed support to become current. Once current, the latest software version available will be provided.

Technical Support Contact Information

LenelS2 provides access to Technical Support via phone, email, web, connect and cumulus during normal business hours. Access to LenelS2 Product Datasheets, Product Documentation and Software Updates are available via the web 24 hours a day. LenelS2 Technical Support hours include business days except LenelS2 Observed holidays.

- **Support Phone:** Here

- **Support Email:** tech.emea.lenels2@honeywell.com

- Web Portal: https://connect.lenels2.com/

Call Workflow

Each support request will be assigned a unique Case Number in the LenelS2 issue ticketing system. Upon entry of your request into the ticketing system, an automatic email will be sent to you acknowledging receipt of your request along with the Case Number. Please read the case creation email as we update information, we feel you should be aware of. Once a Case Number is assigned, all on-going correspondence and phone calls with LenelS2 Technical Support should reference the Case Number.

When submitting a case to LenelS2 Technical Support, you will be required to provide the following information:

Mandatory Information:

- Contact Name (Trained Certified Technician)

- System License ID

Additional Information:

- VAR / Company Name

- Case Severity (S1-S5: See Case Prioritization and Definitions for explanation of these ratings)

- Email Address

- Phone Number / Call Back Number

- System Information (VMS / Controller Type, Version, etc.)

- Custom Solution or Third-Party Integrations involved (if applicable)

- Description of problem (should include date/time when issue occurred and exact error message if applicable, symptoms, etc.)

- Troubleshooting steps already performed

In some cases, customers may be asked to provide additional Remote Access to the LenelS2 Technician so they may access information such as Log Files, Initialization and/or Configuration Files. At the time of initial reporting, a specific Technical Support engineer may be assigned to coordinate the resolution of the reported problem or question. In the interests of achieving efficiency and timeliness in resolving the case, the certified technician who reported the issue must work solely through the assigned Technical Support engineer unless otherwise agreed.

To verify a product error, the customer shall provide a complete description of the issue to enable LenelS2 Technical Support engineers to proceed with the case investigation, including sufficient information to enable LenelS2 Technical Support to reproduce the issue. Technicians and LenelS2 Technical Support will cooperatively execute on all actions required to verify and substantiate the existence of a product issue and to ascertain the conditions under which the case may be duplicated.

During the troubleshooting process for customer reported issues, LenelS2 may request receipt of or access to a customer's database to aid in the resolution process. Using customer information to research and resolve a reported issue provides the following benefits:

- Provides LenelS2 Support with the data used when the issue was encountered,

- It can reduce the time to resolve issues as it reduces the need to create similar scenarios and use cases internally to recreate and further diagnose the issue,

- It further validates our internal testing and QA efforts to validate that the software fix addresses the issue before releasing it to customers, as it can be tested against a known use case.

Note: LenelS2 is sensitive to customers' internal policies and understands that not all customers can release their data set to external agencies or vendors. All data received from a customer is handled in accordance with the LenelS2 Customer Data Use Policy, located on the LenelS2 Customer Support Portal https://portal.lenels2.com/support/s2-policies.aspx. We will process your personal information in accordance with our Privacy Statement.

In the event a customer cannot provide their data set to LenelS2 to aid in the troubleshooting process, LenelS2 will attempt to resolve the issue using one or many of the methods below:

- When available, connect remotely via "LogMeIn Rescue" logmein123.com to a customer's environment and troubleshoot the issue,

- Request the customer move the information to a test system to recreate the issue. LenelS2 can then connect remotely via Rescue to a non-production system, in the event access to the production system is not permitted,

- In the event a Rescue session is not allowed, customers may offer alternative methods for connecting, such as VPN or some other means of remote access,

- Suggest troubleshooting steps via phone, email or other means to the technician and collect the necessary log files and scenario analysis data to aid in the troubleshooting process.

Best Effort Assistance

LenelS2 will only provide best effort technical support for "End of Life" software products to customers who possess a valid Support Plan (SUSP) at the time for which support is requested. Best effort support includes normal LenelS2 TSG troubleshooting until the root cause requires a software modification.

If determined through normal support investigation procedures that the root cause requires a software modification (code change), LenelS2 cannot provide any type of Hotfix or Patch as the version is considered obsolete and unsupported. LenelS2 may attempt to provide a recommended workaround should one exist, although the only remaining course of action may require a software upgrade to a commercially available version.

The Technician requesting support must meet Certification requirements and be employed by a Certified LenelS2 VAR or possess a valid Direct Support Agreement and be a full-time employee of the customer with proper certification. This will ensure that the current system training qualification required to obtain support is maintained.

Case Escalation

At any point during the case resolution process, you may elect to escalate an issue to LenelS2 Technical Support management using one of the following methods:

- Request that the LenelS2 Technical Support Engineer escalates your case,
- Send a request to your LenelS2 Sales or Account Executive to escalate a case,
- Contact LenelS2 Technical Support management (whose contact information is included at the end of every case's email creation acknowledgement).

Once a case is escalated, the Technician will be contacted by the LenelS2 Technical Support management team to discuss your case and document the reason for the escalation. You will be provided with the status of the case, the proposed resolution plan and establish a communication plan to follow up with you directly.

Included Service Items

• Technical Support assistance during normal business hours (Monday – Friday 8:30AM to 5:00PM EST local time excluding US holidays).

• This Support Plan covers only the specific User (Customer) in the Quote provided to the VAR. Systems covered by the Support Plan must have a current supported version of Software installed.

• VARs who desire access to LenelS2's Technical Support under this Support Plan must achieve the VAR qualification. Support covers software configuration, application assistance, database properties and basic operating system functionality.

• Maintenance - LenelS2 shall maintain its software so that it operates in substantial conformity with LenelS2's published specifications. Lenels2 shall utilize commercially reasonable efforts to correct all errors discovered by the VAR, which cause the software to fail to function in accordance with the specifications in any material respect.

• Upgrades – LenelS2 will provide the VAR with new versions of the software (major and minor releases; cumulative and incremental hot fixes) as they become commercially available.

• Support and Response Time - If the VAR detects any consistently reproducible error, defect or nonconformity to the specifications in the software, LenelS2 shall furnish off-site

telephone support, in the form of consultations, assistance and advice on the use or maintenance of the software within twenty-four (24) hours of the VAR's request during normal published business hours. Only VAR personnel who have successfully completed LenelS2's Software training courses may request such support.

• Assistance with problems/errors related to software upgrades.

Excluded Service Items

The following items may be worked on by LenelS2 Technical Support or other organizations within LenelS2, however, depending on the nature and severity of the issue, the VAR or End User may incur a charge for Time and Materials in providing a resolution or recommendations on a solution.

•   System failures or data loss due to lack of maintenance, neglect, network failures or user inflicted malfunctions.

•   Step by step software upgrade assistance.

•   Hardware failure due to natural causes, improper installation or unsupported configurations.

•   Requests to assist with third party software or hardware installation or configuration assistance not provided by LenelS2. Modification of or any attempt to modify any portion of the software without the written approval of LenelS2.

•   Events outside LenelS2's reasonable control or not arising under normal operating conditions.

•   This Support Policy does not include on-site support which, if requested, would be at an additional charge.

•   Use by VAR of software listed in the EOL chart contained in this Support Policy.

VAR Qualifications

VAR's who desire access to LenelS2's Technical Support under this Support Plan must achieve the VAR qualification. Support covers software configuration, application assistance, database properties and basic operating system functionality.

The Technician requesting support must meet Certification requirements and be employed by a Certified LenelS2 VAR or possess a valid Direct Support Agreement and be a full-time employee of the customer with proper certification. This will ensure that the current system training qualification required to obtain support is maintained.

VAR OnGuard Qualification:

Required classroom training:

- OnGuard Hardware and Software Fundamentals (CORE Associate)

- Any other certification for topics requested by Integrator or End User, covered by appropriate class

Classroom or virtual training required for support options listed below:

eLearning required for maintaining all certification levels (Associate, Professional, Expert)

eLearning Courses are required to maintain certifications earned by successfully completing the classroom courses above. These are made available for each commercial new release.

- Access Control (Professional)

- Digital Video (Professional)

- Database Fundamentals (Professional)

- Intrusion (Professional)

- Data Exchange (Expert)

- Custom Reports (Expert)

- Credentialing Technology & Biometrics (Expert)

- Wireless Lock Technology (ILS) (Expert)

- Enterprise Overview (Expert)

See the LenelS2 Training web site at https://www.lenels2.com/en/support/training/ for more details of schedules and available courses or send an email to learning.lenels2@honeywell.com(or training.registration@honeywell.com for EMEA) with specific questions.

Acceptance

Any special pricing contained in this quotation is valid for the above listed project only. Further, special pricing will only be honored if the reseller purchase order

reflects the quantities and items listed EXACTLY as quoted. Any deviation must be approved in writing by LenelS2 Regional Sales Manager prior to submission of

Purchase Order.

Reseller is responsible for final bill of materials.

Unless specifically excepted, terms and conditions detailed in the LenelS2 VAR Price Book are in force.

I accept the terms and conditions of this quotation:

_____

Signature

_____

Date

Legal

Unless you have an approved direct purchase relationship with LenelS2, this quotation is only valid for purchase by or through certified LenelS2 Value Added Resellers ("VAR") in good standing. This quotation is based upon information provided by the VAR or other party requesting this quotation. The VAR or direct purchaser is responsible for the final system configuration and bill of materials. Should project conditions and actual requirements differ from those communicated, the VAR or direct purchaser is responsible for any changes or additional costs.

Any special pricing contained in this quotation is valid for the above listed project only. If special pricing is provided, a copy of this quotation must accompany your purchase order. Purchase orders submitted without this quotation detailing special pricing will be invoiced at LenelS2's current, full non-discounted price. Special pricing will only be honored if the purchase order reflects the quantities and items listed EXACTLY as quoted. Any deviation must be approved in writing by LenelS2 prior to submission of purchase order.

This quotation is not an offer. This quotation and any transaction(s) that may result from it are subject to the terms and conditions detailed in LenelS2's Price Book(s) as well as all terms and conditions of VAR's current. Authorized Value-Added Reseller Agreement with LenelS2 or direct purchaser's current written agreement with LenelS2. LenelS2 reserves the right to modify or change products, pricing or other terms covered by this quotation at any time without advance notice.
